

Folding seat

The two models of folding seat are ideal for locations where an extra place to sit is needed and where space is at a premium – in the bathroom or other rooms where there is often a need to rest – for example, the kitchen, elevator, hall and stairway landing.

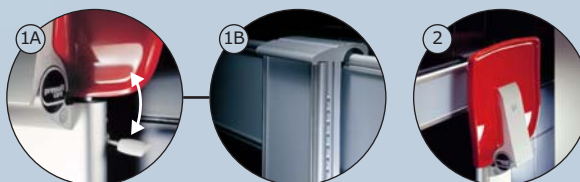

Folding seat: Depth 320 mm
Occupies minimal space.

The height can be adjusted up to 450 mm.

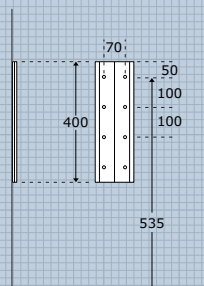

Operation

- ① **Lever lock:** The lever lock behind the seat is lifted at the same time as the seat until there is an audible click. The height of the seat can now be set. When the lever is released, the lock will automatically engage in the grooved track.
- ② **Folding:** When folded up, the seat takes up a minimum of space. This gives more space – for the benefit of both the user and carer.

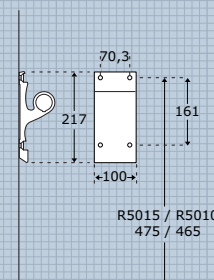

Mounting: Vertical track

Mounting kit for the wall needs to be ordered separately. See page 11.

Mounting: Fixed height

Mounting kit for solid walls is included.

Materials: Aluminium, hardened plastic, plastics

Maximum weight: 135 kg

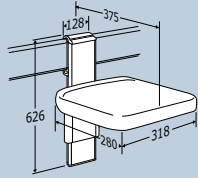

Instructions for mounting products onto different wall types can be downloaded from www.pressalitcare.com
